THE CRYSTAL WOLF

**Lagertha Vest Printing Guide**

All the Lagertha pattern pieces are in .pdfs and must be cut by hand. They have been optimised to make them suitable for either A4 paper or US letter size. You will need to print onto tracing paper to transfer the pattern to leather. Two options for this are: -

1. Put your tracing paper straight through the printer. I did this and had no issues.
2. Tape each tracing paper sheet to A4/US letter paper using double-sided tape and then feed into the machine. Most machines will handle printing on tracing paper this way.

I have grouped the pattern pieces in what I feel was the most efficient way for printing on either A4 paper or US letter paper. Most are separated into two/three sheets which will need to be taped together.

1. Open the .pdf on Adobe Acrobat Reader.
2. Select the printer icon.
3. Check your paper size by clicking on “properties”.
4. Click “poster” and “cut marks”. This will cut the full image onto separate sheets with cut marks making it easier to line up the sheets.
5. Make sure the scale is at 100%.
6. Print the image.

A few of the patterns are on one sheet only. For this you can follow these steps: -

1. Select “Size”.
2. Select “Actual size”
3. Print
