

Hello everyone...I made this bag about Errrrrr..... many times, from a new player become more and more better.... Each time when I made this bag, I always forgot took pictures, anyhow I kept some, it is useful to understand how to make it. Actually, very easy.

PS: This bag is welcome by people very much☺

Let's begin

Step 1: Make the handle, you can put something such as leather cords or cotton cords in it

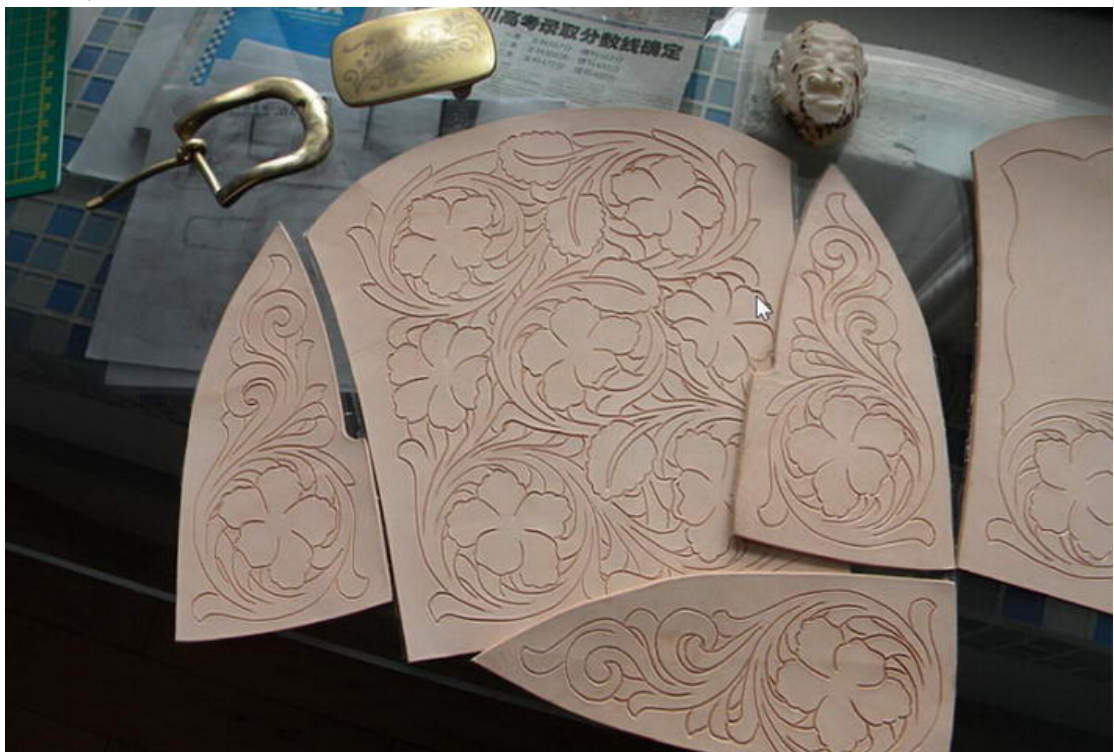

Step 2, Stitch the handle

Step 3: Polish the edge, and almost finished.

Step 4: leather carving and dye, there is no instruction of it. Looooooooooooooooong time to do this step

Step 5: Cut the same size lining as surface, to hide the flesh side, also it is possible to make some inner pockets. You can see the inner pockets are just two pieces of leather, use your image to design different shapes. The pockets were stitched on lining leather.

Step 6: Joint them together, I added a piece of leather stripe to hide the seam, you can do it as me or just stitched them together. Before do this step, I advise you to paint the edge.

Things become clearer and clearer.

Step 7, now we install the zipper on and also use a piece of leather cord to lace two bottom sides. You also can just stitch by thread. All by need.

Step 8, stitch the bottom on. For this step, I designed a bottom board pattern to strengthen the bottom, the board can be paper or plastic board, a hard bottom can put more things in, if you make a smaller shell bag, you can forget it.

I didn't put enough picture of it, let me describe it for you by words:

Wet the edge of the bottom, and make the edge up vertically, glue the plastic board in and blue lining, lining is the same size as bottom, also edge up vertically. The lining can hide plastic board in. Then stitch the bottom on the main body. Here I used a special way, I cut a piece of long leather stripe(2.0mm), the length is as the outer perimeter of bottom, stitch the bottom on it and stitch this long stripe with main body. That will give this bag more strength to stand up. Certainly, can you stitch the bottom directly with the main body. That's all due to your need.

Write in the end:

Lots of people like this bag, and made some changes when they make it, I think this is DIY, there is no rules at all. Some people installed foot nails and made a very looooong handle, because her girl is too high..... Also there are some masters to make so beautiful leathercraft.....Let's work hard.....

Forgot who made it.

Mr. Tian Chen from Singapore.

Miss. Errrrr.... Sorry I forgot again, Dad said I have a wooden head.
