PRINTER CHECK

To verify the pattern prints accurately, make sure this square prints exactly as a 1 x 1 inch square

NOTES:

- This is for an Adult Medium Sized Hand for a full run of sizes (including kids), please purchase our digital pattern at www.springbokcraftsupply.etsy.com

- Use a soft tempered 3 oz leather.

BASIC INSTRUCTIONS (Highly recommend watching the video)

1. Print and trace

Trace your pattern at 100% (ensure 1 inch square in 1 inch) and trace on leather.

2. Cut your pattern

2 pieces of each pattern, you should have 6 pieces total, 3 for the left hand, 3 for the right hand.

3. Arrange your pieces

Place the palm piece and the finger piece together, with the finished top side of the leather facing in. You want to align the thumb parts of each piece (see below).

4. Sew the front pieces

Sew along the thumb all the way across (see above). The pattern shows the stitch line in red.

5. Sew the cuff edge

Fold the edge on the cuff area approximately 1/2 in for all four pieces. Top stitch over to give it a nice finished edge.

6. Sew it all together

Place the back hand piece and the front piece together, with the finished top side of the leather facing in (see image B). Align it all and tape down or clip together. You will need to sew the mitten in 2 parts. From the cuff to just under the thumb, and then from just over the thumb to the other side of the mitten (see image C)

IMAGE B

IMAGE C

7. Trim the excess

8. Turn your mittens

9. Add a lining

Cut your liner pieces exactly the same, with the exception of adding an extra 1.5-2 in to the cuff area (depending on how long you want the cuff to be). Sew the liner exactly the same as the leather mittens. No need to turn the liner, just insert it once you are done sewing and flip the cuff area over.
